Bush

A large domed structure, patterned like cement blocks. The structure is isolated or hidden. The people in the structure are dark-skinned, hostile, and carrying weapons. They live in a very unpleasant mode, planning an activity. There is a large round-folia room with map & charts & communication equipment. The people are carrying weapons. There

Are smaller rooms in the structure,
some of which are used to store ammunition.

Brick

The person is located in an urban area with an Eastern European feeling. The area has many rough structures that are crumbling because of age and damage. The structure is "hidden" among other buildings and is thought to be unused. The windows are boarded up. There are shops and food stalls and street vendors near. Very poor area. Almost like what would be considered a slum area, although the rest of the area isn't that terrible. The better part of area about 3 miles — but it's all connected. There's a lot of white — predominantly the color of the buildings. Sunny, warm.
